

You Are Important

While looking for a typewriter for our office, I found one that was cheaper than all the rest. It looked like all the others except for one thing. Two letters would not work. The other twenty-four letters worked just fine. It had all the numbers and punctuation marks, but for some reason these two kept messing up. I just could not work out the problem. So, you might think I was wrong to buy this typewriter!

After all, in the Lord's church you can always find a few who do not work. Everyone knows it makes no difference; after all, someone else can surely make up the difference. Under these circumstances I do not think you would have wanted a typewriter on which all the keys would not work.

Why do we expect our Lord to be satisfied when all the keys in His church are not working? In case you are wondering how keys not working will cause so much trouble, just look what happens when the #("U") and *("I") don't work.

The congregation here at Sennyside functions better when all the "keys" are working, so it's important that "U" and "I" are here for every worship service, Bible class and involved in every opportunity of serving.

Did you have difficulty in reading this article? If so you can see the difficulties the church will have when each member doesn't do their part. How 'bout "U" and "I" do our parts and make the Lord's work a little less difficult!

See you Sunday!
